MPE proudly receives the Award for International Trade at The Manufacturer MX Awards 2019. From the left, Henry Anson – Managing Director of Hennik Research, publishers of The Manufacturer magazine; Terry Scuoler – Chairman of the Institute of Export & International Trade; Dame Jessica Ennis-Hill, DBE; Tracy Lowe – Procurement Manager of MPE Ltd; David Seabury – Managing Director of MPE Ltd; Alistair McGowan.

Winner of the International Trade Award for 2019

MPE won the International Trade Award for the whole of the UK at The Manufacturer MX (TMMX) Gala Dinner and Awards ceremony held at Liverpool Exhibition Centre on November 14th.

The winners were announced at this annual celebration of the best of British manufacturing attended by more than 700 industry leaders. Guest speakers were the former Olympic, World and European heptathlon and World indoor pentathlon champion Dame Jessica Ennis-Hill, DBE, and the BAFTA-winning BBC impressionist, comedian and writer Alistair McGowan.

This, the largest and most-respected annual Awards programme in the UK manufacturing calendar, is delivered by The Manufacturer magazine in partnership with the Institution of Mechanical Engineers (IMEchE), London SW1.

The Awards were the culmination of a rigorous, four-month schedule of visits by judges who travelled thousands of miles across the UK to benchmark companies' performances.

Judges included previous Manufacturer MX Awards winners, Fellows of the IMechE, representatives from each of the High Value Manufacturing Catapult (HVMC) centres and leading academics, not to mention industry experts from companies such as Airbus, Capgemini UK, Dassault Systèmes, Jaguar Land Rover, Leyland Trucks, RS Components and Santander.

Dick Elsy, CBE, Chief Executive of the High Value Manufacturing Catapult, stated: "As the go-to place for advanced manufacturing in the UK, we are proud to be a judging partner for the TMMX Awards. Awards like these recognise the innovation of manufacturers of all sizes and celebrate the boost that innovation brings to our economy."

Dr Jen Baxter, Head of Engineering at the Institution of Mechanical Engineers, commented: "The winners of these Awards demonstrate the depth and vitality that we have in our manufacturing sector. The contribution that we continue to see from engineers working in manufacturing shows how creative this industry really is. I congratulate all the winners and hope to see more from them in the future."
